

BRIAN SANGERMANO

Software Engineer | Frontend & Fullstack Developer

Briansangermano@gmail.com · linkedin.com/in/brian-sangermano

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building high-performance web applications with React, JavaScript, TypeScript, Vue.js, and Next.js. Focused on performance optimization and maintainable code built to last. Experienced working in frontend teams within Agile/Scrum environments, with a strong emphasis on clear communication and continuous improvement. Looking for a stable role where technical challenge and professional growth are part of the culture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, React Hooks, Redux, Zustand, React Query, Vue.js, Next.js, Material-UI, Styled Components, Tailwind CSS, Framer Motion, React Router, React Navigation

Tools & Platforms: Git, GitHub, Vite, Webpack, Vercel, Storybook, Figma, Firebase, JIRA, Azure, VtexIO

Testing: Jest, React Testing Library, Playwright

APIs & Databases: REST API, Node, Express, GraphQL, MongoDB, Mongoose

AI development tools: GitHub Copilot, Cursor, Claude, SDD, OpenCode

Practices: SOLID, SCRUM, Responsive Design, Flexbox, SDLC, CI/CD, Performance Optimization, Refactoring

PROFESSIONAL EXPERIENCE

Clorian

Apr 2024 – Present | Frontend Developer

Leading Spanish company providing digital solutions for the cultural, sports, and entertainment industries (ticketing, event management, and online sales).

- Developed and maintained React + TypeScript applications in production, ensuring code stability and long-term maintainability.
- Integrated APIs and backend services to deliver dynamic, high-performance interfaces for high-traffic ticketing platforms.
- Built custom UI components and checkout/payment modules, directly contributing to improved conversion rates.
- Collaborated with UX/UI designers to create responsive, accessible interfaces aligned with modern web standards.
- Optimized and refactored existing frontend codebases, reducing technical debt and improving rendering performance.

PinApp

May 2023 – Dec 2023 | Frontend Developer

Software company specializing in high-impact digital solutions for enterprise clients.

- Built an e-commerce frontend with React and VtexIO, enabling a reusable module architecture across client platforms.
- Designed and implemented responsive interfaces using React, CSS Flexbox, and GraphQL data layers.
- Delivered custom checkout modules, improving purchase flow reliability and UX consistency.

- Documented and refactored the frontend codebase, increasing team velocity and onboarding efficiency.

Radium Rocket

May 2018 – May 2023 | Software Engineer (Frontend Focus)

Professional software services company building engineering teams for web and mobile product development.

- Contributed to the frontend team across multiple client projects, building stable and maintainable React codebases with Redux.
- Drove performance optimization initiatives by applying responsive image best practices and CSS Flexbox techniques.
- Designed RESTful APIs and performed code analysis for system testing, bridging frontend-backend integration.
- Developed interactive UIs based on client goals and behavior patterns to optimize the user experience.
- Presented progress and new features in SCRUM ceremonies to team leads and the broader team.

Dodwing

May 2017 – Apr 2018 | Frontend Developer

Engineering and development services company serving clients in Europe and the US.

- Participated in the full SDLC: design, coding, testing, debugging, and production support for web applications.
- Designed and developed client-side JavaScript solutions including web forms and process simulation tools.
- Built a proof-of-concept web application for occupational health and safety needs.
- Delivered product manuals and client training, maintaining close relationships with stakeholders.

Interamerican Open University

Mar 2016 – May 2017 | Frontend Developer

- Built and maintained frontend websites using JavaScript and React for internal university platforms.
- Developed and maintained API endpoints for an external service enabling customer data access.
- Responsible for code reviews, releases, and selecting new tools and libraries to modernize the stack.
- Added features using React, Redux, and Lodash; enforced ES6 standards and version control with Git.
